# Scope of Operations

# *Truck Scale Video Intercom System*

*Customer would like to upgrade the Truck Scale Intercom System*

⇒ *A Video Intercom Station will be installed at the truck scale.*

⇒ *A 16" Horn will be wired to intercom station to increase volume for the truck drivers.*

⇒ *Customer must provide a Cat5e/6 PoE (802.3af, class 0) Cable at Intercom location with a static IP address on their network.*

⇒ *A Video Master Station will be added at each desk.*

⇒ *Customer must provide a Cat5e/6 PoE (802.3af, class 0) Cable at Intercom location with a static IP address on their network.*

## *Sequence of Operation:*

1. Truck will pull on the scale
2. Truck Driver will hit the "call" button on the intercom station
3. All 3 Video Master Station Phones will ring and display a view of the driver from Video Intercom at Truck.
4. Truck driver will talk hands free.
5. Call is ended by the Video Master Station at the desk.
