Advance Scale, Inc. is a Certified Scale Company and complies with all regulations set forth by NIST Handbook 44 along with Local State Weights and Measures requirements. In addition to this Advance is also an ISO 17025 Accredited Calibration Laboratory.

Please review the following options below and choose the specific Calibration Service required by your organization.

Calibration Service Requested

Calibration Service	Level 1	Level 2	Level 3	Level 4
Ensuring that all scale system mechanics and/or electronics are in proper working condition	✓	✓	✓	✓
Checking and/or adjusting scale calibration according to the tolerance limits referenced in the NIST Handbook 44 or according to existing calibration guidelines, as specified and accepted by the customer	✓	✓	✓	✓
Noting any problems or discrepancies in scale operation or condition on service reports	✓	✓	✓	✓
Standard service report describing the work performed	✓	✓	✓	✓
Calibration sticker affixed to the device	✓	✓	✓	✓
1 Point Accuracy Test	✓			
4 Point Accuracy Test		✓	✓	✓
Repeatability Test			✓	✓
Eccentricity Test			✓	✓
Reporting of "As Found" and "As Left" calibration results	✓	✓	✓	✓
Legal For Trade		✓	✓	✓
Measurement Uncertainties				✓
Creation, electronic storage, maintenance and issuance of Certificate of Calibration (a separate certificate for each device, with results reported for each test point)			✓	✓
Recording of environmental conditions at the time of the test (temperature and humidity)			✓	✓
QR code on each piece of equipment. This gives your Quality Department and Audit Team the last Calibration Certificate	✓	✓	✓	✓
NIST traceability and notification if mass standards used were found to be inaccurate	✓	✓	✓	✓
USP 41 / USP 1251			✓	✓
17025 Accredited Logo				✓
Custom Customer specific calibration or reporting requirements				✓

Notes:

- Statements of conformity resulting from the calibration performed on the above quoted item(s) will not take into account the reported measurement uncertainty unless otherwise specified.
- The methods Advance Scale uses are developed by Advance Scale and are based on the current revisions of international, national or industry standards unless otherwise specified. Methods can be reviewed by the customer upon request

Please complete the following:

- Our organization requires ISO 17025 Accredited Calibration Procedures which is inclusive of the NIST H-44 required Calibration Procedures on the weighing equipment at this facility.
 Yes No please initial _____
- Our organization requires United States Pharmacopeia USP General Chapter 41 "Balances". Weighing should be performed using a balance that is calibrated over the operating range and meets the requirements defined for repeatability and accuracy.
 Yes No please initial _____
- Our Organization requires Legal for Trade NIST HB-44 Calibration Procedure which satisfies the buying and selling of goods on the weighing equipment.
 Yes No please initial _____
